

NATIONAL ENGAGEMENT ON Digital Health & Social Care

In partnership with the Department of Health and the Health Service Executive.

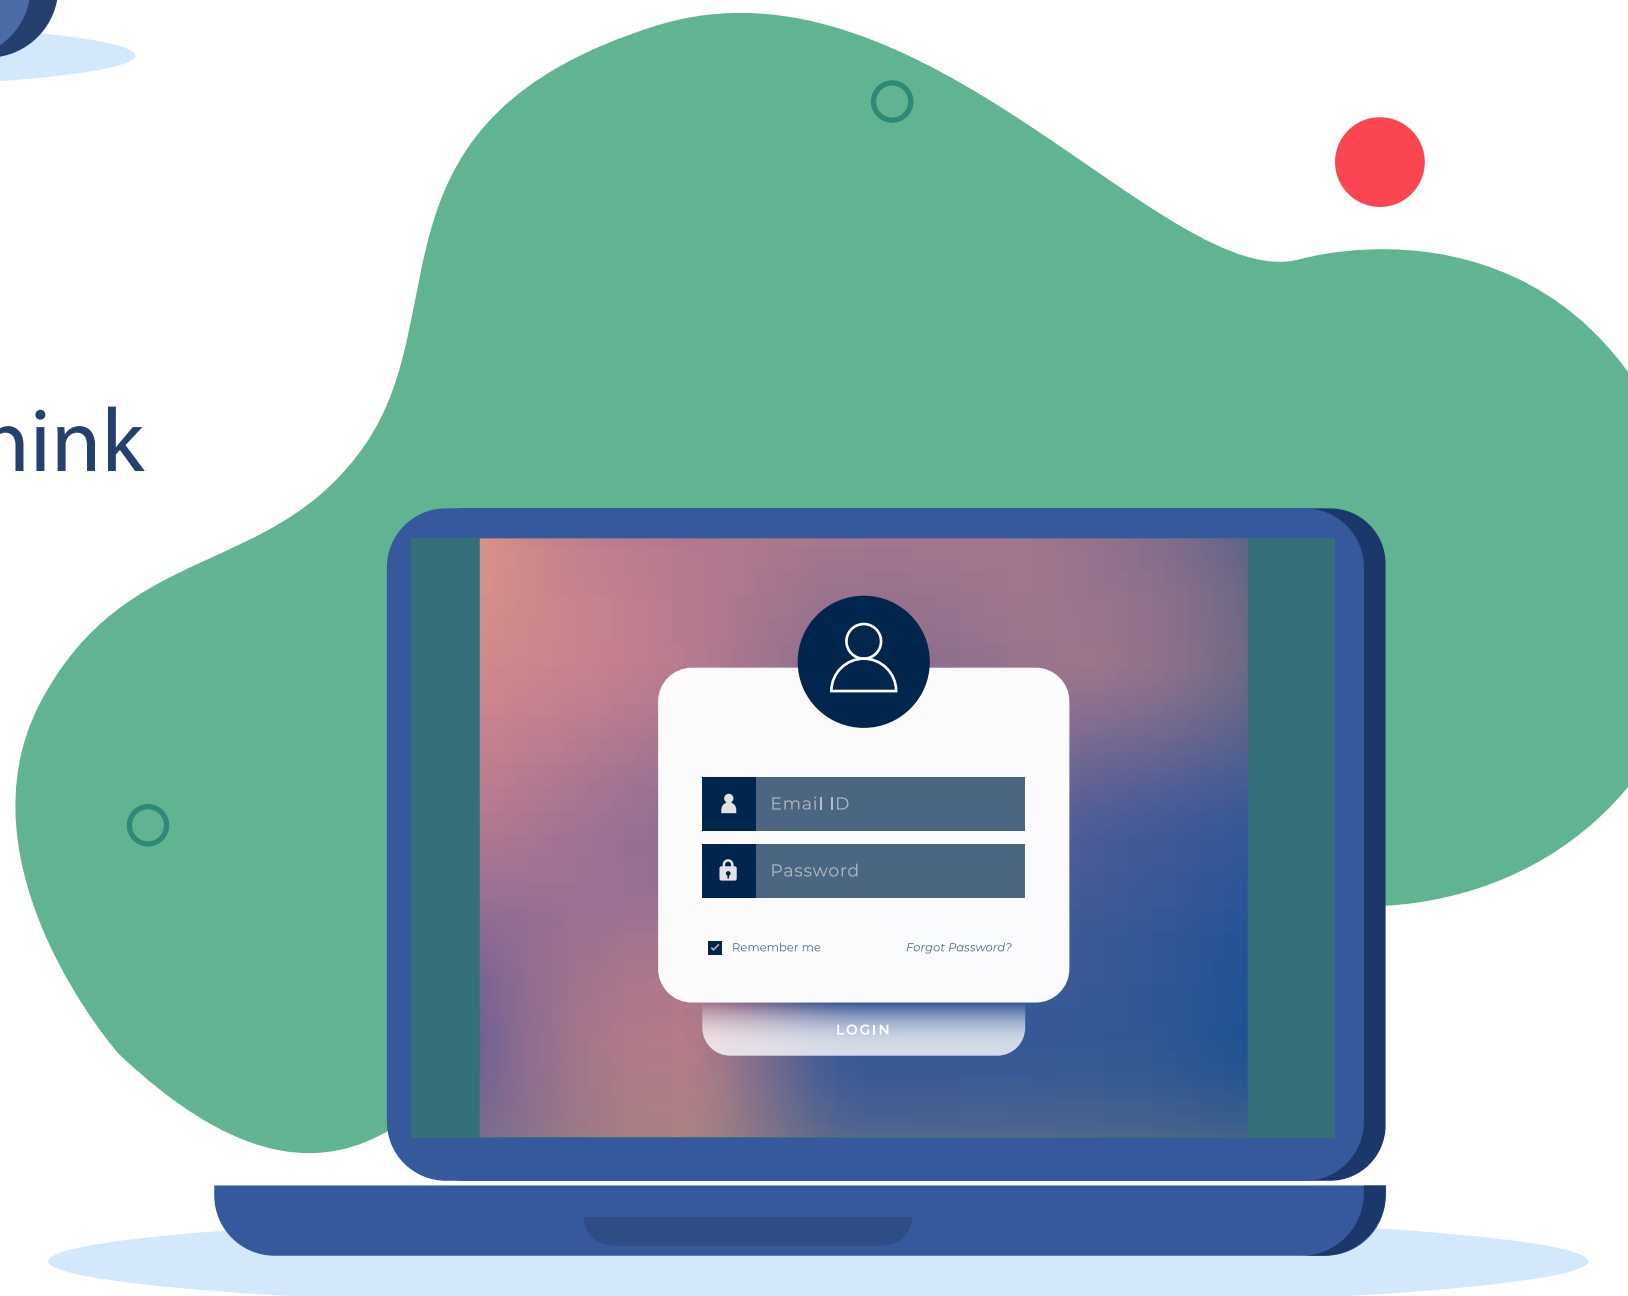

We want to hear the public's views.

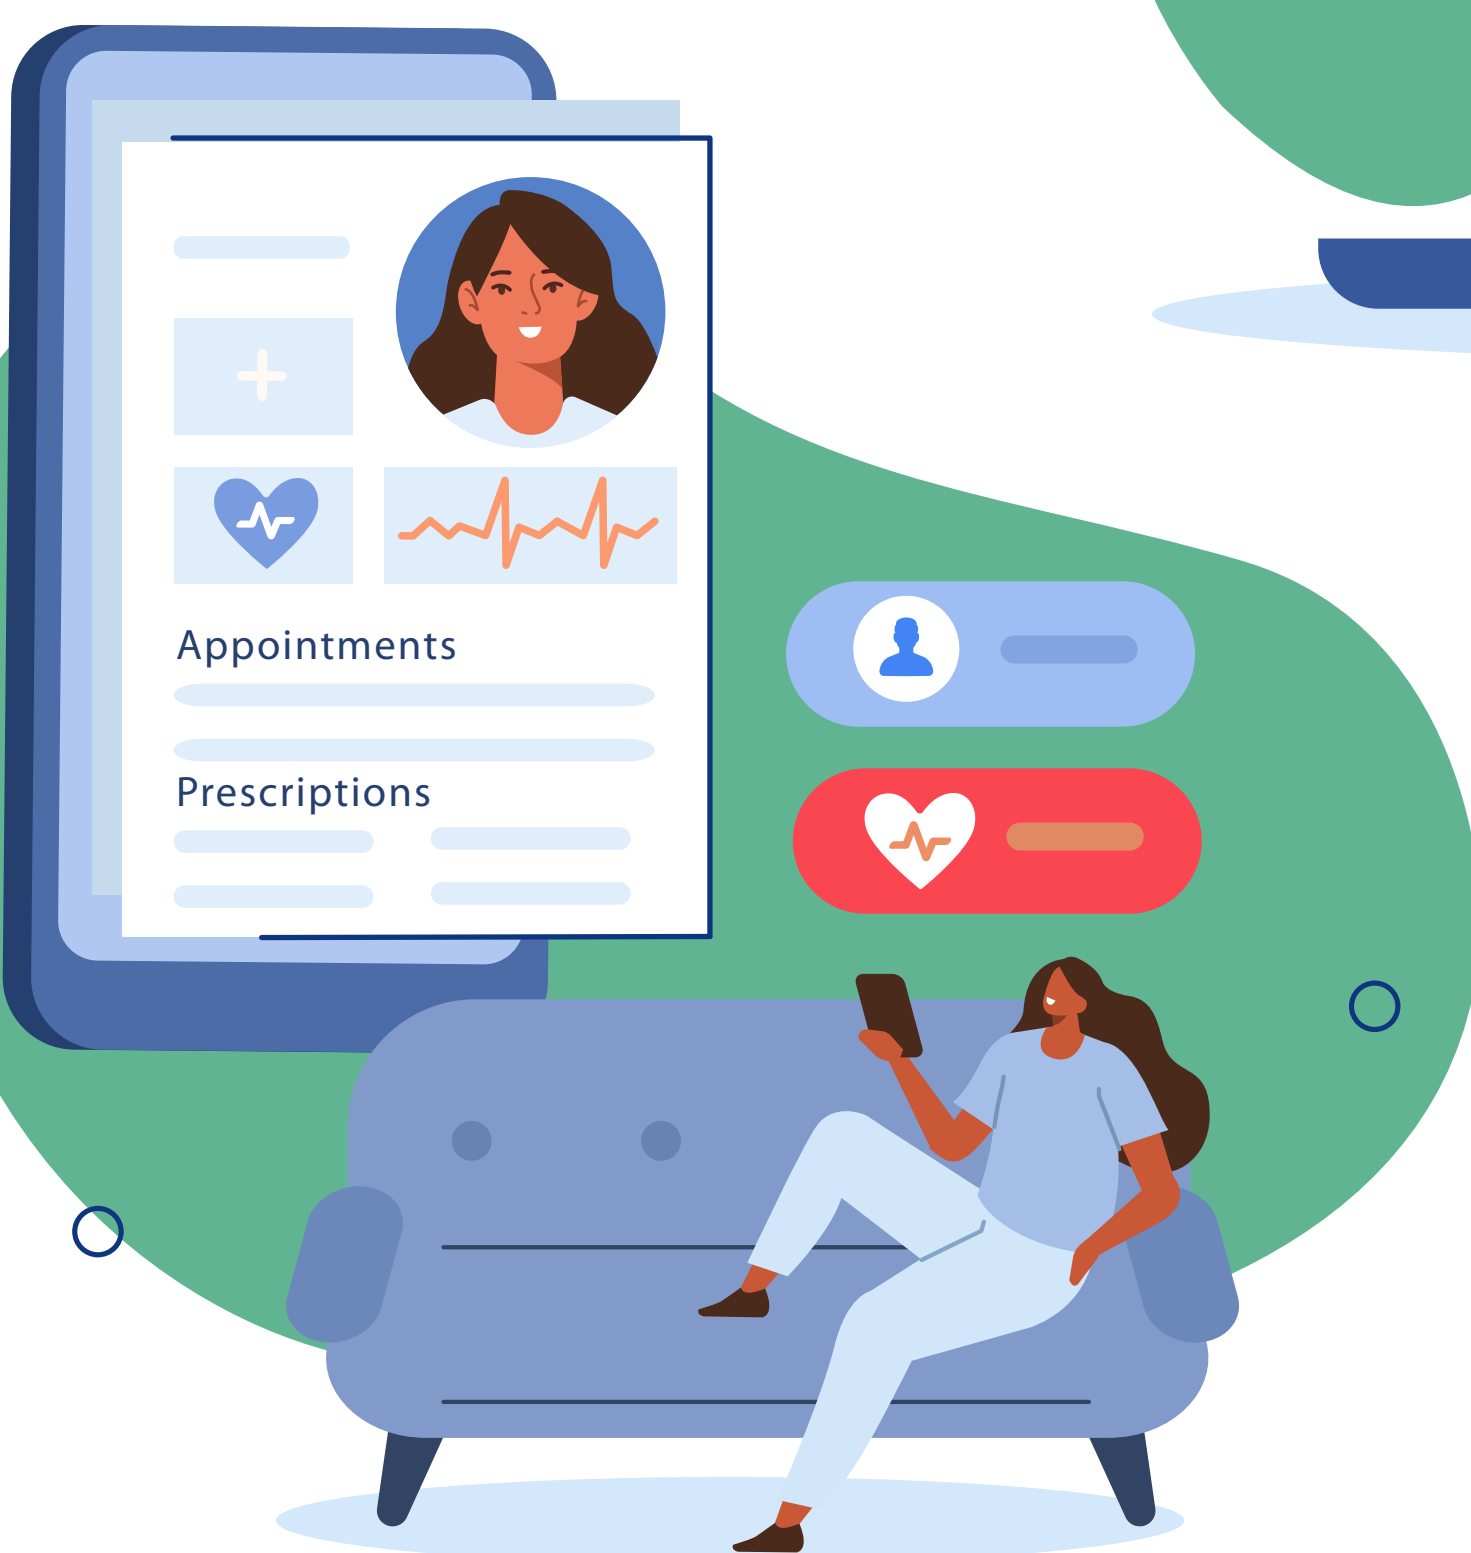

We are doing a telephone survey with the public on digital health and social care.

We want to know what you think of having digital access to your own health and social care information.

We also want to know what you think of using digital tools in health and social care to communicate with and receive care from professionals.

If you are contacted, please complete the survey.
